Art Unit: 2872

DETAILED ACTION

Allowable Subject Matter

Claims 19-26, 34-35 are allowed.

Claims 19-26, 34-35 are allowable over the prior art for at least the reason that even though the prior art discloses a diffraction optical element divided into two grating regions, each region having a different duty, and a variable pitch, or a diffraction grating having a variable pitch and variable groove width, the prior art fails to teach or reasonably suggest, a diffraction optical element divided into a plurality of grating regions, wherein at least one of said grating regions has a variable pitch and a variable groove width, as set forth by the claimed combination.

In Miyake's diffraction optical element, all the grating regions have the same groove width L (Figs. 6b-6d). Kadowaki's diffraction optical element comprises a single grating region 61 (Fig. 2A).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
